Joan - can you pass along any update you heard on this issue. I heard from Dan Bergo the AC and IC data manager on a call this am that the viewer has been cleared for use and they are working on a few minor issues. Can you confirm? Johanna

George, Danny, thank you. I don't need to be on the 9:30 call, but would like a quick report out on the status.

Joan,
I've spoken with Danny Hart in our web office and told him that I agree that it makes sense to add to the website. I think the HQ EOC had some concerns yesterday, as some of the sampling data had been pulled down to address some problems. I believe that was resolved last night. Danny Hart, who I've copied on this e-mail, should be able give us a status report. - George

I can check my sent items, but I spoke directly with George and Reggie on the topic. First Reggie, and he referred me to George.

I still would love to get together to discuss:

1) pulling all the information NOT related to the viewer off of the epaosc.org website.

2) what would need to be done should we ever decide the spatial data viewer is a useful tool to inform the public.

See the attached report that we run every day to track web traffic on the epaosc site.

Many of my responsibilities are transferring to the field today so we may want to talk before I become much less available.

M
